Note: See appendix A for an explanation of terms used.

(D) Withheld to avoid disclosing figures for individual companies.

(NA) Not available. (X) Not applicable. Standard Notes: - Represents zero.

[1] Represents gross shipments of the mineral indicated by the Industry name less minerals transferred to other establishments for preparation or less minerals received from other establishments for preparation.

[2] Represents expenditures during the year for both new and used plant and equipment.

[3] Figures for cost of minerals received for preparation are included with those for cost of supplies, purchases for resale, and purchased fuels and electric energy.

[4] Excludes figures for minerals produced and used in the same establishment.

[5] Includes figures for minerals produced and used in the same establishment in making manufactured products. The value of such products was estimated.

[6] Figures for the value of shipments of primary products by establishments classified in other industries are included with those for the value of shipments of primary products by establishments classified in the specified industry.
